

WEBINAR *series*

26 June 2025
12:00 CEST

Join us for the webinar, presented in collaboration with Agilent Technologies, to learn about the latest innovations in PFAS analysis. This series of events is designed to meet modern labs' evolving needs.

Webinar title

OVERCOMING THE ANALYTICAL CHALLENGES WHEN TESTING FOR PFAS IN WATER

Short description

PFAS are often called “forever chemicals” because they break down very slowly, accumulating in the environment and in the bodies of humans and animals over time. Given their persistence and potential health impacts, there is growing awareness and enforcement aimed at PFAS, especially in water.

This presentation will outline a range of solutions that Agilent has developed to address PFAS to meet the stipulations of the corresponding EU regulations.

REGISTER

MS Teams

Whether you are an analytical scientist, lab manager or business owner, this webinar is an essential opportunity to stay up to date on the latest trends and best practices in this emerging area of concern.

Speaker

Henry Russell

IDO Environmental Lead and LCMS Product Specialist
